

CLEAN SIXTEEN

BY PURITY

Clean Label Project tested **160 protein powders** from **70 of the top-selling brands** - representing **83% of the market**

The dirtiest 5 protein powders contain exponentially more heavy metals, per serving, than the Clean Sixteen cleanest protein powders (shown below). How much more?

47% of Protein Powders Exceeded California Prop 65 Limits for toxic heavy metals in one serving

45.9x more Cadmium | **38.4x** more Lead | **31.5x** more Arsenic | **2x** more Mercury

These **16 protein powders** stood out as **non-detect (ND)** for **Lead, Cadmium, Mercury & Arsenic**
